

## **Novarad Nets Seven International Contracts for NovaPro RIS/PACS For Radiologist Groups**

**American Fork, Utah**, January 9, 2012 – Novarad's NovaPro PACS and RIS built specifically for radiologist groups that read for multiple hospitals, clinics and imaging centers, has been selected by seven facilities:

- Divine Grace Hospital in Cavite City, Philippines
- Emory University Hospital in Atlanta, Ga. This contract was facilitated by Novarad distributor Novarad South
- Laboratorios TJ Oriard S.A. de C.V. in Naucalpan, Mexico
- Samsun Egitim ve Arastirma Hastanesi in Samsun, Turkey
- San Pableo Community Hospital in San Pable City, Philippines
- Singleton Associates in The Woodlands, Texas. This contract was facilitated by Novarad distributor Novarad South
- Universal Imaging Services in Kearney, Neb. This contract was facilitated by Novarad distributor Brown's Medical Imaging

NovaPro, available both as an installed system or Software as a Solution (SaaS), facilitates the receipt of DICOM images from unlimited, unaffiliated image producing practices and ensures images and information remains separate. Image retrieval is provided without the necessity to store or maintain the image files. Received images are scrubbed from the archive when the storage limit, pre-determined by the interpreting physician, is reached. However, if the storage and archiving of images and reports is required, the system is configurable to be a complete PACS.

### **About Novarad**

Headquartered in American Fork, Utah, Novarad Corp. was founded in 1990 by a radiologist focused on providing superior methodology for remote viewing. Novarad has led the industry in the use of off-site archiving systems, IHE based RIS and off-the-shelf hardware applications. Currently serving more than 800 healthcare facilities around the globe, Novarad continues to be a leader in providing innovative, cost-effective imaging solutions. For more information about Novarad, visit [www.novarad.net](http://www.novarad.net).
