

## **Novarad Wraps 2011 With Installations of its Radiology Technologies At 127 Sites Worldwide**

**American Fork, Utah**, Jan. 26, 2012 – Novarad continued global growth during 2011 completing 127 installations for new contracts. Of these installations, 15 percent were new international contracts. Installations included:

- [NovaPACS](#), 84 installations of the company's web-based PACS can be completely customized by the user and includes MPR / 3D, integrated dose monitoring (NovaDose), rapid reading / reporting features, voice recognition, templating, advanced tools and features, critical findings, quality control and overread and discrepancy reporting.

- [NovaRIS](#), 20 installations for this companion solution. Developed on the same platform as NovaPACS, that generates reports, measures profitability and facilitates paperless management of patient records.

- [NovaMG](#), 19 installations of the FDA 510(k) cleared and IHE compliant digital breast imaging viewer that supports multi-modality viewing, iCad and R2 structured reports.

- [NovaCardio](#), 4 installations finished for the Integrated Cardiology PACS/CVIS information management system.

In addition to extending its installations, the company marked several firsts including the first company to integrate its PACS with DoseMonitor radiation dose monitoring software, creating [NovaDose](#); partnering with Dell to offer [Novarad Total Archive](#) with Dell's Unified Clinical Archive and launching three [mobile viewers for iPad](#).

"Our network of in-house sales, distributors, certified resellers and group purchasing organizations help us to continue to deliver the reach of a large company with the personalized service that we are known for," said Paul Shumway, vice president at Novarad. "We are also focused on innovating new products and leveraging technology partnerships to meet the evolving needs of the industry to categorically provide customers with RIS/PACS solutions for life."

### **About Novarad**

Headquartered in American Fork, Utah, Novarad Corp. was founded in 1990 by a radiologist focused on providing superior methodology for remote viewing. Novarad has led the industry in the use of off-site archiving systems, IHE based RIS and off-the-shelf hardware applications. Currently serving more than 800 healthcare facilities around the globe, Novarad continues to be a leader in providing innovative, cost-effective imaging solutions.
